

The **BIG** solution to your supply chain needs

Big

Bulk Commodities

Whether you are shipping liquids, grain, feed or any other bulk commodity, MEGA has the experience and the knowledge to effectively manage your company's transportation.

Bulk Hopper equipment offered to service our customer needs for the transportation of feed, grain & fertilizer products. For difficult load and unload areas, this equipment can be "broken up."

Bulk Liquid equipment is offered to service customer needs when it comes to transporting of liquid feed, asphalts, dust abatement, roofing asphalts, parking lot sealants and most refined products. This equipment is insulated for temperature sensitive products.

Bulk Pneumatic equipment if utilized for servicing of dry products that need to be unloaded at facilities with no unload systems. "Breaking Up" is also possible with this equipment, including agricultural "in field" deliveries. Will be certified to have no contaminants.

Bulk Vacuum equipment is for self loading of products at a facility with no loading system.
